FIRE DETECTION SYSTEMS & ALARMS – MAINTENANCE

Course information, syllabus and terms & conditions

A one day practical and theory course, with regards to BS5839-1, focusing on the practical requirements, (with practical tasks/fault finding) of the previous design course. The day ends with a written examination.

Who is it for:

Fire alarm technicians
Owners and Managers of Fire Companies

COURSE STRUCTURE / SYLLABUS

- Section 1: Brief BS5839 Pt 1 Overview
- Section 2: System Components and their positioning
- Section 3: Maintenance Requirements
- Section 4: Practical Application
- Section 5: Non Routine Servicing
- Section 6: False alarm management
- Section 7: Documentation
- Section 8: Examination

An ISO 9001 – 2008
Accredited organisation
No. 441430

The Independent Fire Engineering & Distributors Association
The Barn, Radclive Road, Gawcott, Buckingham MK18 4AA

LEARNING OUTCOME

At the end of the course the candidate will have knowledge of:

- Design overview, including various categories of L1,L2, L3 & L4
- The types of system components, how they function and their positioning
- Maintenance - System requirements in a 12 month window
- Practical applications to include: Perform a short circuit test, an open circuit test, measure off load current, full load current etc – find earth faults on both addressable and non-addressable systems
- False Alarm Management and the required documentation
- All of the above with regards to BS5839-1

It becomes necessary to cancel courses if minimum attendance is not achieved and in these cases cancellation is advised 14 days prior to the course start date.
