

Technical Memo

I.F.E.D.A. MEMBERS INFORMATION/TECHNICAL UPDATE

From: The National Office

Number 13

1st April 2004

British Standards Amendments & Updates

An essential requirement of a quality management system is to be able to prove that the company is in possession of & working in accordance with the appropriate British Standard(s).

To assist you in achieving this IFEDA subscribe to British Standards Plus Update Service.

We will receive on a report from British Standards every month that will confirm that the listed standards are either unaltered or amended or replaced in which case the amendment or replacement standard should be added to your quality system.

You will therefore receive confirmation every month from the National Office the numbers of the standards we hold confirming that they are either unchanged or listing any alterations and/or replacements.

The first of these notes is issued with this memo & should be retained in your quality records for the necessary period of time (most UKAS Certification bodies will want you to keep records for 3 years)
