

Technical Memo

I.F.E.D.A. MEMBERS INFORMATION/TECHNICAL UPDATE

From: The National Office

Date: 9th August 2004.

Number 21

CEODEUX CO2 VALVES.

We have received information that the above valve manufacturer has recommended:-

That a maximum torque of 50 Nm for their CO2 hand lever valves with M25x2 thread and the use of aluminium cylinders.

By using other cylinder materials, the correct tightening torque should be specified for the specific application.

See also their instruction manual.

If you fit CO2 valves and would like a copy of the complete information note please fax or e-mail your request to the National Office.

Thanks to Steve Evans of Amerex for this information.
